# Lactogenic differentiation of HC11 cells is not accompanied by downregulation of AP-2 transcription factor genes

Richard Jäger\*, Leontios Pappas and Hubert Schorle

Following the publication of our article [1], an error in Table 1 was noted. The primer sequences used for PCR of  $\beta$ -casein are incorrectly stated.

The  $\beta$ -casein primer pair has been incorrectly stated as:

$\beta$ -casein sense: 5'-CCATCCTGCGTCTGGACCTG-3'

$\beta$ -casein antisense: 5'-GGAATGTTGTGGAGTGG-CAG-3'

The correct  $\beta$ -casein primer pair that has been used in the study is:

$\beta$ -casein sense: 5'-GCCTTGCCAGTCTTGCTAAT-3'

$\beta$ -casein antisense: 5'-GGAATGTTGTGGAGTGG-CAG-3'

We apologise for any inconvenience this may have caused.
